Yashwantrao Chavan vidyalay
SSC: 72.85%

Pimpode bk
2016-2017

PROJECTS

Smart Parking System Using Node MCU and IOT Technology.

The Smart Parking System using Node MCU and IoT (Internet of Things) technology is a project designed to address parking management challenges.

Technologies Used: IOT technology, cloud connectivity ,mobile application

Student Management System:

Develop a student management system that allows to perform operations for student data, including features such as adding, deleting, update and retrieving student information.

Technologies Used: Host on AWS Cloud, Spring Boot, Angular

Task Management System:

Develop a Task Management System using Spring Boot with a many-to-one relationship between tasks and users. This system should allow users to create, view, add, and delete tasks. Each task should be associated with a single user, where multiple tasks can belong to the same user.

Technologies Used: Host on AWS Cloud, Spring Boot, Angular

Restaurant Website: Create Restaurant Website by using HTML and CSS
